

Contraindications

***Disclaimer**

It is required that the client consult with their Physician prior to taking, altering or stopping any form of medication and/or supplements, or making changes to their dosing cycles etc.

Unfortunately, not everyone is a good fit for the lip blush procedure. They may have something (such as symptom or condition) that makes this procedure inadvisable. The following is a list of contraindications for the lip blush treatment:

- Under 18 years of age
- Diabetes
- Pregnant or lactating women
- Glaucoma
- Skin diseases such as psoriasis, eczema and undiagnosed rashes or blisters on the site that is to be treated
- History of cold sores (if so, consult with your physician. Many clients avoid coldsore breakouts by taking a Valtrex cycle prior to their appointment.
- Allergies to makeup or colors
- Easily triggered post inflammatory hyper pigmentation
- Transmittable blood conditions like HIV or Hepatitis
- Active skin cancer in the area to be tattooed
- Hemophiliac
- Healing disorders
- Blood thinners (consult with your physician)
- Uncontrolled high blood pressure or mitral valve disorder
- Accutane or steroids (consult with your physician)
